

The Green Growth Knowledge Partnership (GGKP) is a global network of experts and organizations dedicated to providing knowledge, guidance, data and tools to support a transition to an inclusive green economy.

The GGKP's three knowledge platforms—**Green Policy Platform**, **Green Industry Platform and Green** Finance Platform—equip policymakers and advisers, small and medium-sized enterprises, and the financial sector with quick and easy access to innovative research, toolkits, case studies, data sets and learning opportunities to help them make evidence-based decisions about how to green their operations.

The platforms offer everything from global-scale assessments and highly specialized guidance notes, to the latest insights on green policy, business and finance.

Knowledge management

GGKP platforms host the world's largest repository of knowledge products designed to support green economic growth. Users can browse 193 country pages or find information by sector, region or cross-cutting theme, such as gender, jobs, circular economy and natural capital.

Knowledge generation

The GGKP establishes data-driven research and partnerships to advance green growth practices and policies. It facilitates expert groups to identify and prioritize knowledge gaps, catalyse coordinated responses and develop joint knowledge products.

Knowledge sharing

The GGKP delivers the latest knowledge for greener policy, business and finance to a growing global community in real time. In-person and digital spaces provide opportunity for debate and discussion on critical and emerging issues.

The GGKP was founded in 2012 and is led by a steering committee of senior representatives from the Global Green Growth Institute (GGGI), Organisation for Economic Co-operation and Development (OECD), United Nations Environment Programme (UNEP), United Nations Industrial Development Organization (UNIDO) and World Bank. The GGKP draws together more than 80 partner organizations.

Knowledge, data, and tools for a policy-driven transition to a green economy

What can you find on the Green Policy Platform?

4,000+

resources from leading institutions and experts for developing greener policies and economies.

The Global Library

is the largest existing collection of green growth reports, articles, guidance, tools and other publications produced by leading institutions and experts.

The Learning Hub

offers the latest information on individual courses, academic programmes and webinars on various green growth topics.

The Case Studies Database

hosts over 400 case studies of on-the-ground lessons from 90 countries across six continents.

The "+Platforms"

provide partner initiatives with dedicated websites in the GGKP knowledge management ecosystem.

Helping small and medium-sized enterprises become more competitive by going green

The Green Industry Platform's **I-GO solution** has been developed to support SMEs throughout their resource efficiency process, from awareness building to implementation.

The I-GO solution's **SME Support Centre** offers quick and easy access to guidance and support services to help companies develop a resource efficiency strategy and implement targeted actions.

Building on the SME Support Centre is a self-assessment tool that provides a tailored list of recommendations, guidance and support services based on an SME's resource efficiency status.

The Green Industry Platform also offers resources to other key industry actors, including governments, business associations and larger corporations, to promote greener industry policies and practices in transitioning towards sustainable economies.

Catalysing, promoting and mainstreaming sustainable finance

The Green Finance Platform provides the global financial sector with critical sustainable finance information sourced from partner networks and key institutions active in sustainable investing, lending and insurance underwriting strategies.

The **Green Finance Library** provides guidance on:

Identifying new domains of knowledge linked to sustainability limits, risks and opportunities to ensure investors, banks and insurers provide efficient capital allocation towards a just, net-zero economy.

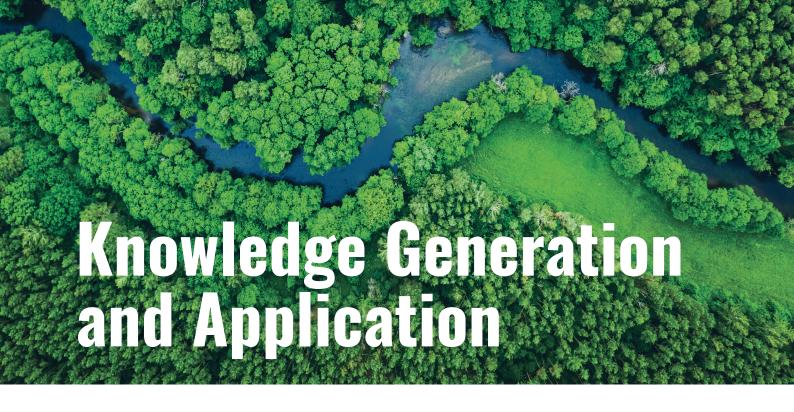

Increasing financial actors' awareness on ESG factors as important determinants of long-term value, resilience and transparency.

Signaling the requirements for financial institutions' governance to manage sustainability materiality and drive positive impact.

The Green Finance Measures Database consolidates 660+ policy and regulatory measures to promote the development of green finance, bringing together instruments from 100 developed and developing countries.

The GGKP's Knowledge Generation and Application Programme (K-GAP) establishes interinstitutional expert groups to collaboratively identify green growth knowledge gaps and to address those gaps through in-country knowledge applications and stakeholder advocacy. GGKP expert groups bring together senior representatives from key institutions and leading experts to foster collaboration on green growth economic planning.

The K-GAP's natural capital agenda promotes natural capital investment at national, regional and global levels by 2030. It has two major priorities: nature restoration to achieve national Sustainable Development Goals (NC4-SDGs) and mainstreaming nature in African development finance (NC4-ADF).

An applied research, communications and advocacy project to support national governments to achieve the SDGs through natural capital investment.

Integrating natural capital in the lending operations of leading African development finance institutions and the processes of Regional Member Countries of the African Development Bank Group (AfDB).
