

**Batumi Initiative on Green Economy (BIG-E)**  
**Actions by Poland**

**Country:** Poland, State Forests

**Title:**

**Small retention in lowlands and mountainous areas**

*Focus area 3:* Enhance ecosystems and ecosystem services as part of ecological infrastructure

**Description of the action:** In the financial perspective of 2014-2020, State Forests intends to proceed with a project of small retention in lowlands and mountainous areas under the changed name of “Complex project of forest and forestry adaptation to climate changes – small retention and water erosion prevention in lowlands and mountainous areas” - the project will be implemented within the II Priority Axis of the Infrastructure and Environment Operational Programme (measure 2.1 adaptation to climate change, protection and enhancing resilience to natural disasters and environmental monitoring). The main assumption of the project is to protect forests against threats arising from climate change.

**Action's timeframe/milestones, as appropriate:** —

**Type of action:** Economy and fiscal instruments

**Economic sectors:** forestry, water

**Reference instruments and sources, as appropriate:** —

**Expected co-benefits and impact of outcome:** Adaptation to climate change, prevention of erosion

**SDG's target(s) that the action may contribute to implement:** 6,12

**Implementation of Environmental Performance Review (EPR) Recommendations, as appropriate:**

**Objectively verifiable indicators, as appropriate:** —

**Partners:**
