Enhancing resource efficiency and reducing material footprint to meet climate commitments

11:30-13:00, 12 December, UNFCCC COP25
Blue Zone, San Pedro de Atacama Hall

Hosted by the One Planet Network, International Resource Panel and UNFCCC.

Increasing the efficiency by which our global economy uses resources is one of the most cost-effective and equitable ways of reducing greenhouse gas emissions and meeting climate commitments set out in the Paris Agreement.

This event will demonstrate the contribution of increased resource efficiency to climate change mitigation and the importance of applying resource efficiency policies and strategies to achieve the Paris Agreement goals. It will showcase the scientific evidence, as well as policies and actions taken to decrease the material footprint of the economy which also accelerate and increase the reduction of GHG emissions.

Key Speakers:

H.E. Krista
Mikkonen,
Minister of
Environment,
Finland

Achim Steiner,
Administrator,
UNDP

Inger Andersen,
Executive Director,
UN Environment
Programme

Martin Frick,
Director of
Implementation,
UNFCCC

Mark Radka,
Chief, Energy &
Climate,
UN Environment
Programme

René Castro,
Assistant Director-
General,
FAO

Izabella Teixeira,
Co-Chair of the
International
Resource Panel

Gonzalo Muñoz,
Founder, TriCiclos,
High-Level
Climate Champion
